What is this product?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund seeks, over a period of more than 5 years, to optimise the risk/reward trade-off compared to that of the main global stock markets (primarily those of OECD countries).

Part invested in equities: discretionary investment policy, when taking investment decisions, financial analysis of the companies takes precedence over the perception of the financial markets and the economic and political climate, which supports these decisions.

Part not invested in equities: interest rate products, money market funds or cash.

The sub-fund invests 25% to 70% of its net assets in equities of listed companies (including a maximum of 20% having their registered office in countries that are not members of the OECD including Chinese A shares listed on the markets of the People's Republic of China via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect) and up to 70% situating outside the eurozone.

It may occasionally invest up to 30% of its net assets in securities assimilated with equities or bonds (convertible bonds, bonds with warrants, priority dividend shares, investment certificates and equity securities). The degree of equity exposure, after taking into account derivative financial instruments: from 0 to 70%. Investment in shares is performed without any sectoral, capital or monetary restrictions. It may invest 0 - 75% of its net assets in bonds rated at least BBB (S&P or equivalent). It may invest up to 10% of its net assets in high-yield bonds (with ratings of less than BBB-), and up to 10% of its net assets in unrated bonds.

The sub-fund may invest up to 10% of its net assets in UCITS and/or other UCI units, including money market funds. It may invest in futures and options financial derivatives (on regulated and on over-the-counter markets). It may invest in equity, interest rate and currency risks. It may take positions to hedge all or part of the portfolio and/or achieve a performance objective. The use of

forward financial derivatives will not generate over-exposure and may result in the sub-fund's equity exposure ranging from 0 to 70%. The expected proportion of the sub-fund's net asset value covered by total return swaps is less than 10%. For more details : refer to the prospectus.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended investor

This product is intended for investors seeking income and capital growth over the medium- to long-term (at least 5 years). The investor may incur losses up to the amount invested. This product is suitable for investors with basic and in-depth knowledge and experience of the product and the global equity markets.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: equity risk, derivative risk, counterparty risk, risk of capital loss

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period: 5 years Example investment: 10,000 EUR		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,660 EUR	6,150 EUR
	Average return each year	-33.4%	-9.3%
Unfavourable	What you might get back after costs	8,330 EUR	8,630 EUR
	Average return each year	-16.7%	-2.9%
Moderate	What you might get back after costs	10,160 EUR	10,740 EUR
	Average return each year	1.6%	1.4%
Favourable	What you might get back after costs	11,420 EUR	13,310 EUR
	Average return each year	14.2%	5.9%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between September 2017 and September 2022.

Moderate scenario: This type of scenario occurred for an investment between January 2016 and January 2021.

Favourable scenario: This type of scenario occurred for an investment between October 2020 and October 2025.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if CLARTAN ASSOCIÉS is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	522 EUR	1,586 EUR
Annual cost impact (*)	5.2%	2.8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 1.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year

Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.9% of the value of your investment per year. This is an estimate based on actual costs over the last year.	193 EUR
Transaction costs	0.3% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	29 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

The conversion of part or all of the shares is free of charge.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

You should be prepared to stay invested for 5 years. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer. Redemptions are possible on each full bank business day in Luxembourg. In exceptional circumstances, your right to request the redemption of your investment may be limited or suspended.
