

GLOBAL STRATEGY

The fund invests in a responsible and sustainable manner in European small and mid-sized companies. Over a period of at least five years, it aims to increase the value of invested capital and to outperform the main European euro-denominated small and mid-cap indexes. The fund is at least 92% invested in equities from countries that are member states of the Council of Europe.

MONTHLY MANAGEMENT COMMENTS

As of February 27, the equity investment rate stands at 98.5%, with nearly 50% in companies with a positive impact. February was marked by rather encouraging but very mixed earnings reports. Geopolitical tensions continue to keep markets on edge at the start of the year, and volatility is present in our asset category. Our small and mid-cap stocks rose by 3% in February. This month, we increased our holdings in Bank of Ireland, NKT, Moncler, Fineco, and Knorr-Bremse. Coloplast was sold, and we reduced positions in Arcadis, DormaKaba, Euronext, Kion, and Prysmian.

ESG RATING

CARBON INTENSITY*

EXCLUSIONS

Companies generating 5% or more of revenue in the following sectors: Weapons, non-conventional weapons, coal, adult entertainment, tobacco, oil sands, gambling, nuclear energy, GMO, shale oil and gas, pipelines for non-conventional oil or gas; Companies involved in major ESG controversies, such as serious and irreversible environmental damage, human rights violations, corruption, etc.

POSITIVE IMPACT

Companies whose products and services contribute to sustainable development, such as renewable energy, smart transportation, sustainable water management, the circular economy, healthcare, sustainable construction, etc.

DEFINITIONS

| | |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ESG | Environment, Social and Governance |
| ESG LEADER / IMPACT | Best practice in terms of social and environmental responsibility (SER) / A significant share of the solutions and services offered have a generally positive impact in responding to global challenges. |
| ESG STRONG PERFORMER / IMPACT | Recognises sustainability issues and is implementing cutting-edge SER policies / Innovative solutions and services with a generally positive impact in responding to global challenges. |
| CHALLENGER | Positive steps to adapt in recognition of sustainability issues. These companies are often candidates for promotion to the categories above. |
| FOLLOWER | Significant controversies and/or seemingly failing to manage environmental and social issues satisfactorily and/or with governance that presents a significant risk for shareholders. |
| LAGGARD | Active in sectors excluded by Ethos, involved in major controversies or failing to meet minimum standards in SER and governance matters. |

SYNTHETIC RISK INDICATOR (SRI)

Risk Scale from 1 (lowest risk) to 7 (highest risk), category 1 does not mean the investment is risk free. The risk category of this Fund is not guaranteed and may change over time. The risk level derives from the exposure of the sub-fund to equity markets.

MAIN RISK FACTORS

EQUITY MARKETS, CAPITAL LOSS, CURRENCY, NON FINANCIAL, LIQUIDITY

The SICAV's investments on ESG criteria may lead to deliberate restrictions being applied to the potential investment universe. The application of these non-financial criteria may result in foregoing investment opportunities, underweighting certain holdings or concentrating the portfolio. In addition, the adoption of ESG criteria, while it supports long-term sustainability, could reduce returns in the short term if the SICAV is obliged to dispose of a holding on the basis of non financial changes despite its financial performance.

The "Clartan Ethos ESG Europe Small & Mid Cap" fund was awarded the Investissement Socialement Responsable (ISR) label on 3rd October 2023, and was assessed as compliant with the SRI V2023 label requirements on 12th December 2024. This label was created in 2016 by the French government to distinguish funds that apply a robust methodology for socially responsible investment (SRI), resulting in concrete and measurable outcomes. The ISR label is granted for a renewable period of three years.

Among the indicators monitored in the sustainability report, the the two indicators selected for the ISR labeling are:

- E¹ (environnement): breakdown of companies with targets or commitments aligned with the «Science-based Target» initiative, by number of companies
- G² (governance): gender diversity on the board of directors

These indicators are published monthly, and the fund must achieve a better result than the initial universe. The historical data for these two indicators is included in the sustainability report.

| ISR INDICATORS (AT 27 February 2026) | | | | |
|--------------------------------------|------------------------------------------------------------------|--------|-------------------|-------------------------------------|
| | | FUND | INITIAL UNIVERSE* | BETTER/ WORSE |
| E | SHARE OF COMPANIES COMMITTED TO LIMITING GLOBAL WARMING TO 1.5°C | 66.3% | 51.6% | <input checked="" type="checkbox"/> |
| | ISR E COVERAGE RATE | 100.0% | 100.0% | |
| G | PERCENTAGE OF WOMEN ON THE BOARD OF DIRECTORS | 38.7% | 38.0% | <input checked="" type="checkbox"/> |
| | ISR G COVERAGE RATE | 100.0% | 97.6% | |

* The implementation of Ethos' socially responsible investment principles reduces the initial investment universe by at least 30% and defines the responsible investment universe in which the securities are selected by the fund managers. The table compares the fund's performance to that of the initial universe (better / worse).

¹ Prioritizing investments in companies that integrate climate change issues into their business models and aim to limit their greenhouse gas (GHG) emissions is one of the fund's objectives (see pre-contractual disclosures). The selected E indicator is a measure of climate alignment that considers the progress dynamics of companies and also emphasizes future emissions; it better reflects the achievement of the fund's ESG objectives than any of the individual climate indicators and other environmental indicators as defined in tables 1, 2, and 3 of annex 1 of delegated regulation (EU) 2022/1288 (which reflect a past situation).

² The selected G indicator ranks among the Principal Adverse Impacts in 13th position in table 1 of annex 1 of delegated regulation (EU) 2022/1288.
